

PLANTS THAT ATTRACT BEES TO THE GARDEN

To welcome bees into your garden, you should select the kind of flowers that attract them with nectar and pollen

Honeybees may collect nectar from a wide variety of flowers, but many wild bees are partial to native flowers. Many native flowers are now considered weeds, but planting a good selection of such flowers can entice native bees into your garden.

Listed below are a few plant suggestions

Allium (Ornamental Onion)

(Deciduous bulb)
